

Table of Contents

Chapter 01 | Getting Started

Lesson 01 User Interface	12
Lesson 02 Creating and Modifying Basic Objects	46
Lesson 03 Scene File Manipulation	58
Lesson 04 Selecting Objects	78
Lesson 05 Transforms	92
Lesson 06 Object and Scene Organization	126
Lesson 07 Project Folders	154

Chapter 02 | Modeling

Lesson 08 Geometrical Object Types	160
Lesson 09 3D Parametric Objects	178
Lesson 10 Using the Modifier Stack	198
Lesson 11 Essential Modifiers	222
Lesson 12 Object Cloning	246
Lesson 13 Low Poly Modeling	260
Lesson 14 Creating Shapes	296
Lesson 15 Spline Editing	316
Lesson 16 Creating Objects from Splines	346
Lesson 17 Using Compound Objects	370
Lesson 18 Light Types	416

Chapter 03 | Lighting

Lesson 19 Simple Lighting Setup	440
Lesson 20 Lighting Tools	460
Lesson 21 Indirect Illumination and Exposure Control	468

Lesson 22 Simulating Sunlight	482
Lesson 23 Lighting Effects	508

Chapter 04 | Materials

Lesson 24 Working with the Material Editor	542
Lesson 25 Material Types	556
Lesson 26 Using Predefined ProMaterials	566
Lesson 27 Using Predefined ProMaterials	592
Lesson 28 Mapping Coordinates	566
Lesson 29 Arch & Design Material	642
Lesson 30 Using Multi Sub-Object Materials	682

Chapter 05 | Rendering

Lesson 31 Cameras	704
Lesson 32 Backgrounds	724
Lesson 33 Rendered Frame Window	750
Lesson 34 Rendering Output Choices	764
Lesson 35 Batch Rendering	776
Lesson 36 RAM Player	782

Chapter 06 | Animation

Lesson 37 Basic Animation Principles	792
Lesson 38 Keyframe Animation	798
Lesson 39 Alternative Animation Methods	826
Lesson 40 Creating Hierarchies	838
